শ্রীচিডর্স

Option (a)

$$18 \div 3 \times 2 + 8 - 6 = 10$$

$$\Rightarrow 18 - 3 + 2 \times 8 \div 6 = 10$$

$$\Rightarrow 18 - 3 + 2 \times \frac{8}{6} = 10$$

$$\Rightarrow 18 - 3 + \frac{8}{3} \neq 10$$

Option (b)

$$18 - 3 + 2 \times 8 \div 6 = 14$$

$$\Rightarrow 18 \div 3 \times 2 + 8 - 6 = 14$$

$$\Rightarrow 6 \times 2 + 8 - 6 = 14$$

$$\Rightarrow 12 + 8 - 6 = 14$$

শ্রীচিডর্স

Option (c)

$$18 - 3 \div 2 \times 8 + 6 = 17$$

$$\Rightarrow 18 \div 3 - 2 + 8 \times 6 = 17$$

$$\Rightarrow 6 - 2 + 48 \neq 17$$

Option (d)

$$18 \times 3 + 2 \div 8 - 6 = 15$$

$$\Rightarrow 18 + 3 \times 2 - 8 \div 6 = 15$$

$$\Rightarrow 18 + 6 - \frac{8}{6} \neq 15$$

10. (a)

$+ \Rightarrow \times$	$- \Rightarrow \div$
$\times \Rightarrow -$	$\div \Rightarrow +$

$$6 + 64 - 8 \div 45 \times 8 = ?$$

$$\Rightarrow ? = 6 \times 64 \div 8 + 45 - 8$$

$$\Rightarrow ? = 6 \times 8 + 45 - 8$$

$$\Rightarrow ? = 48 + 45 - 8$$

$$\Rightarrow ? = 93 - 8 = 85$$

11. (a)

$\times \Rightarrow -$	$+ \Rightarrow \times$
$\div \Rightarrow +$	$- \Rightarrow \div$

$$175 - 25 \div 5 + 2 \times 3 + 10 = ?$$

$$\Rightarrow ? = 175 \div 25 + 5 \times 2 - 3 \times 10$$

$$\Rightarrow ? = 7 + 10 - 30$$

$$\Rightarrow ? = 17 - 30 = -13$$

12. (d) $6 + 12 = 18$

$$\text{Therefore, } ? = 4 + 12 = 16$$

13. (b) $(7)^2 - 1 = 48$

$$7 + 4 = 11$$

$$(11)^2 + 1 = 122$$

$$\text{Therefore, } (13)^2 - 1 = 168$$

$$13 + 4 = 17$$

শ্রীচিডর্স

$$(17)^2 + 1 = \boxed{290}$$

14. (a) $(11)^2 + 1 = 122$

$$(13)^2 + 1 = 170$$

$$(17)^2 + 1 = 290$$

$$(19)^2 + 1 = \boxed{362}$$

26. (a) Mahabalipuram, derived from ‘Mamallapuram’ is the prior and colloquial name of a town in Kancheepuram district in the Indian state of Tamil Nadu, now officially called Mamallapuram. Mahabalipuram was a 7th century port city of the South Indian dynasty of the Pallavas near the city of Chennai in Tamil Nadu. The name Mamallapuram is believed to have been given after the Pallava king Narasimhavarman I, who took on the epithet Maha-malla (great wrestler), as the favourite sport of the Pallavas was wrestling. It has various historic monuments built largely between the 7th and the 9th centuries, and has been classified as a UNESCO World Heritage Site.

27. (a) Ajivika (“living” in Sanskrit) was a system of ancient Indian philosophy and an ascetic movement of the Mahajanapada period in the Indian subcontinent. Ajivika was primarily a heterodox Hindu (Nastika) or atheistic system. The Ajivikas may simply have been a more loosely-organized group of wandering ascetics (shramanas or sannyasins). One of their prominent leaders was Makkhali Gosal. Ajivikas are thought to be contemporaneous to other early Hindu nastika philosophical schools of thought, such as Charvaka, Jainism and Buddhism, and may have preceded the latter two systems.

28. (b) Greater India was the historical extent of the culture of India beyond the Indian subcontinent. This particularly concerns the spread of Hinduism in Southeast Asia, introduced by the Indianized kingdoms of the 5th to 15th centuries, but may also refer to the spread of Buddhism from India to Central Asia and China by the Silk Road during the early centuries of the Common Era. To the west, Greater India overlaps with Greater Persia in the Hindu Kush and Pamir mountains. The term is tied to the geographic uncertainties surrounding the “Indies” during the Age of Exploration.

31. (b) The best way for a bank to avoid loss is to accept only sound collateral. In lending agreements, collateral is a borrower’s pledge of specific property to a lender, to secure repayment of a loan. The collateral serves as protection for a lender against a borrower’s default - that is, any borrower failing to pay the principal and interest under the terms of a loan obligation. If a borrower does default on a loan (due to insolvency or other event), that borrower forfeits (gives up) the property pledged as collateral - and the lender then becomes the owner of the collateral. In a typical mortgage loan transaction, for instance, the real estate being acquired with the help of the loan serves as collateral. Should the buyer fail to pay the loan under the mortgage loan agreement, the ownership of the real estate is transferred to the bank. The bank uses a legal process called foreclosure to obtain real estate from a borrower who defaults on a mortgage loan. Collateral, especially within banking, traditionally refers to secured lending (also known as asset-based lending).

32. (c) Roman trade with India started around the beginning of the Common Era following the reign of Augustus and his conquest of Egypt. Following the Roman-Persian Wars Khosrow

I of the Persian Sassanian Dynasty captured the areas under the Roman Byzantine Empire. The Arabs, led by 'Amr ibn al-'As, crossed into Egypt in late 639 or early 640 C.E. That advance marked the beginning of the Islamic conquest of Egypt and the fall of ports such as Alexandria, used to secure trade with India by the Greco Roman world since the Ptolemaic dynasty. The decline in trade saw Southern India turn to Southeast Asia for international trade, where it influenced the native culture to a greater degree than the impressions made on Rome. The Hunas invaded the Roman Empire under Attila the Hun in 454 C.E. প্র্যাচিভর্ক

34. (b) Igneous rock (derived from the Latin word ignis meaning fire) is one of the three main rock types, the others being sedimentary and metamorphic rock. Igneous rock is formed through the cooling and solidification of magma or lava. Igneous rock may form with or without crystallization, either below the surface as intrusive (plutonic) rocks or on the surface as extrusive (volcanic) rocks. This magma can be derived from partial melts of pre-existing rocks in either a planet's mantle or crust. Typically, the melting is caused by one or more of three processes: an increase in temperature, a decrease in pressure, or a change in composition. Granite is the best-known igneous rock. Many people recognize granite because it is the most common igneous rock found at Earth's surface and because granite is used to make many objects that we encounter in daily life.
35. (d) The people of the Indus Civilization achieved great accuracy in measuring length, mass, and time. They were among the first to develop a system of uniform weights and measures. 37. (b) Surface tension is a contractive tendency of the surface of a liquid that allows it to resist an external force. This property is caused by cohesion of similar molecules, and is responsible for many of the behaviors of liquids. It is revealed, for example, in the floating of some objects on the surface of water, even though they are denser than water, and in the ability of some insects (e.g. water striders) to run on the water surface.
38. (d) The preamble to the Constitution of India is a brief introductory statement that sets out the guiding purpose and principles of the document.. It says: "WE, THE PEOPLE OF INDIA, having solemnly resolved to constitute India into a SOVEREIGN SOCIALIST SECULAR DEMOCRATIC REPUBLIC and to secure to all its citizens: JUSTICE, social, economic and political; LIBERTY, of thought, expression, belief, faith and worship; EQUALITY of status and of opportunity; and to promote among them all FRATERNITY assuring the dignity of the individual and the unity and integrity of the Nation; IN OUR CONSTITUENT ASSEMBLY this twenty-sixth day of November, 1949, DO HEREBY ADOPT, ENACT AND GIVE TO OURSELVES THIS CONSTITUTION." প্র্যাচিভর্ক

41. (a) Bio gas is a clean unpolluted and cheap source of energy in rural areas. It consists of 55-70% methane which is inflammable. Bio gas is produced from cattle dung in a bio gas plant commonly known as gobar gas plant through a process called digestion. It helps in reducing the deforestation as it arrests for cutting of trees for firewood. It also helps in maintaining ecological balance, in rural sanitation and it needs Lower capital cost and almost cost free maintenance. প্র্যাচিভর্ক
42. (c) Food production or agriculture is a primary activity of economy making direct use of

natural resources. This includes agriculture, forestry and fishing, mining, and extraction of oil and gas. This is contrasted with the secondary sector, producing manufactured and other processed goods, and the tertiary sector, producing services. Infrastructure is basic physical and organizational structures needed for the operation of a society or enterprise, or the services and facilities necessary for an economy to function. The term typically refers to the technical structures that support a society, such as roads, bridges, water supply, sewers, electrical grids, telecommunications, and so forth.

43. (b) Judima is a local fermented drink made with rice, brewed by the Dimasa community in Assam. It derives its name from words *ju* which means wine and Dima means 'belonging to the Dimasa'. It is the first traditional brew in all of northeast to bag GI tag.
44. (d) Heart is the only organ in the body which never rest throughout the entire life. The heart is a hollow muscle that pumps blood throughout the blood vessels by repeated, rhythmic contractions. It is found in all animals with a circulatory system (including all vertebrates). The vertebrate heart is principally composed of cardiac muscle and connective tissue. The average human heart, beating at 72 beats per minute, will beat approximately 2.5 billion times during an average 66 year lifespan.
45. (a) In India, two great leaders, M.N. Roy and Jayaprakash Narayan, have at different times advocated partyless democracy. Jayprakash Narayan never held a formal position in the government, but remained a leading political personality operating outside party politics. Late in his life, he regained prominence as an active critic of the increasingly authoritarian policies of Prime Minister Indira Gandhi, Mohandas Gandhi's daughter. His reform movement called for "partyless democracy," decentralization of power, village autonomy and a more representative legislature. Narayan was popular for his Four Theories-Marxism, Democratic Socialism, Partyless Democracy based on Sarvodaya and Total Revolution.
46. (b) Nanasahab Peshwa, also known as Balaji Baji Rao, was the son of Bajirao from his marriage with Kashibai and one of the Peshwa of the Maratha Empire. He contributed heavily to the development of the city of Pune, India. He

was appointed as Peshwa by Chatrapati Shahu himself. Nanasahab lost his cousin, Sadashivrao Bhau (the son of Chimaji Appa), and his eldest son, Vishwasrao, at the [Third Battle of Panipat].

47. (d) Dehydration is the condition where there is acute shortage of water in our body. This occurs when the amount of water leaving our body is greater than the amount consumed. There are three types of dehydration: hypotonic or hyponatremic (primarily a loss of electrolytes, sodium in particular), hypertonic or hypernatremic (primarily a loss of water), and isotonic or isonatremic (equal loss of water and electrolytes). In humans, the most commonly seen type of dehydration by far is isotonic (isonatraemic) dehydration which effectively equates with hypovolemia, but the distinction of isotonic from hypotonic or hypertonic dehydration may be important when treating people who become dehydrated.
48. (d) The Comptroller and Auditor General (CAG) of India, G C Murmu has been selected as the external auditor of the International Atomic Energy Agency (IAEA), for a period of six years. His tenure will be valid from 2022 to 2027.
49. (c) Zojila Pass connects Leh and Srinagar.
50. (d) Right to Information is a part of fundamental rights under Article 19 (1) of the Constitution which states that every citizen has freedom of speech and expression. The 86th Constitutional amendment making education a fundamental right was passed by Parliament in 2002. Right to speech comes under freedom of speech and expression which is a fundamental right. The constitution guarantees the right to life and personal liberty as a fundamental right under article 21. Right to property is still a constitutional right under article 300A of the constitution.

$\therefore OD =$ In-radius

অ্যান্টিভার্স

$= \frac{1}{3} \times 3\sqrt{3} = \sqrt{3}$ cm.

\therefore Area of the in-circle $= \pi r^2$

$= \pi \times \sqrt{3} \times \sqrt{3} = 3\pi$ sq.cm.

73. (d) For an increase of 50% in the circumference of circle, the radius of circle should be increased by 50%.

Then, required percentage increase in the area of the circle

$= 50 + 50 + \frac{50 \times 50}{100}$

$= 100 + 25 = 125\%$

74. (a) $x + \frac{1}{x} = 5$

On cubing both sides,

$\left(x + \frac{1}{x}\right)^3 = 5^3$

অ্যান্টিভার্স

$\Rightarrow x^3 + \frac{1}{x^3} + 3x \cdot \frac{1}{x} \left(x + \frac{1}{x}\right) = 125$

$\Rightarrow x^3 + \frac{1}{x^3} + 3 \times 5 = 125$

$\Rightarrow x^3 + \frac{1}{x^3} = 125 - 15 = 110$

On squaring both sides,

$$x^6 + \frac{1}{x^6} + 2 \cdot x^3 \cdot \frac{1}{x^3} = 12100$$

প্র্যাচিওর্স

$$\Rightarrow x^6 + \frac{1}{x^6} = 12100 - 2 = 12098$$

75. (b) $3x + \frac{3}{x} = 1$

$$\Rightarrow x + \frac{1}{x} = \frac{1}{3}$$

On cubing both sides,

$$x^3 + \frac{1}{x^3} + 3\left(x + \frac{1}{x}\right) = \frac{1}{27}$$

$$\Rightarrow x^3 + \frac{1}{x^3} + 3 \times \frac{1}{3} = \frac{1}{27}$$

$$\Rightarrow x^3 + \frac{1}{x^3} + 1 = \frac{1}{27}$$
